25X1A5a1 [redacted] O/CI, told me that AD/Commo is investigating a [redacted] a special cipher device being developed by AFSAY D-804. Experimental models will be ready in February and [redacted] understands that General Smith is very much interested in the machine when ready. He plans to use it for direct secure communication between his Office and the Pentagon. [redacted] points out that a secure telephone communications line of this nature would be extremely valuable between O/CI and O/DD/I, and recommends that consideration be given to its installation, using a direct cable that [redacted] understands is now in place between [redacted] and "Q" Building.

2. At DD/I request, I discussed paragraph 1 of [redacted] dealing with the Agenda for the forthcoming Tripartite Intelligence Conference with [redacted] of FE. This was in line with DD/I's discussion with Admiral Stout and agreement that CIA would discuss Agenda items with Admiral Stout in Washington prior to their inclusion on the official Agenda. [redacted] states that the items mentioned in paragraph 1 of subject cable does not come under this category and are not in conflict with it.
